

Permit to Immobilise Main Engine

Masters/Owners and Agents are advised that a vessel berthed in Aberdeen Harbour cannot immobilise its main engines without first obtaining authorisation from the Harbour Master.

The form "AHB Immobilisation Form" should be completed and submitted to VTS for approval.

Masters/Owners and Agents are advised that the permit is only valid on common user berths and where possible VTS should be advised prior to the vessels arrival that a request for immobilisation will be submitted.

Please note that the completion of this form does not guarantee permission and is subject to operational requirements

Brian Andrew
Assistant Harbour Master
Harbour Office
1st August 2006.
